SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (method used) - Non-flammable
Flammable Limits - Not applicable
Extinguishing Media: Use self contained breathing apparatus.
Special Fire Fighting Procedures: Use water spray, dry chemical, or CO₂
Unusual Fire and Explosion Hazards: Fire will utilize gases above 475°

Note: The National Toxicology Program has listed Ni and NiO as possible cancer hazards. Although these forms of nickel are not active ingredients of this mixture they may be products of reactions, or formed when the mixture is heated. Please see the attached sheet for more information.

SECTION VI - HEALTH HAZARD INFORMATION

Effects of exposure: Highly irritating to the mucous membranes of the eyes, respiratory tract and the skin. Individuals hypersensitive to nickel may develop asthma, bronchitis,
shortness of breath or wheezing. Causes irritation and sensitization or allergic reactions which may be accentuated by heat and humidity.

FIRST AID
Eye Contact: Irritant to naked eye; in case of contact flush eyes well for 15 minutes. Obtain medical attention.
Skin Contact: Irritant to exposed skin. Flush skin well with water for 15 minutes. Remove affected clothing. Get medical attention.
Inhalation: If inhaled, remove to fresh air. If not breathing give artificial respiration. Seek medical attention.

SECTION VII - SPILL, LEAK AND DISPOSAL PROCEDURES

Spills and Leaks: Cover the contaminated areas with absorbent material. Scoop up gross quantities. Place in DOT approved container.
Disposal: Dispose of in accordance with all federal state and local regulations. Aqueous waste treatment if allowed. If not, contact professional disposal agency.

SECTION VIII - SPECIAL PROTECTION INFORMATION

Respiratory Protection: NIOSH approved organic vapor respirators where adequate ventilation is not present.
Ventilation: Where adequate ventilation is not available use NIOSH approved vapor respirator with dust, fume and mist filters. Local ventilation through fume hoods or laminar flow stations is also preferred. Keep fumes away from strong bases or reducing agents.
Protective gloves: Skin contact should be minimized through use of rubber gloves.
Other Protective Equipment: Steel tipped shoes
Eye Protection: Safety goggles, eye wash station, chemical safety shower, chemical retardant clothing, face shield.

SECTION IX - SPECIAL PRECAUTIONS AND COMMENTS

Storage and handling information. Store below 60 °F. Store in a cool, dry place. Do not store near incompatible products or open flame. Store away from direct sunlight.

Approval: M.E. Hecht, President

Judgements as to the suitability of information herein for purchaser's purposes are necessarily the purchaser's responsibility. Therefore, although reasonable care has been taken in the preparation of such information, Transene extends no warranties, makes no representations and assumes no responsibility as to accuracy or suitability of such information for application to purchaser's intended purpose or for consequences of its use.

Copyrights 1981 Science Relates Materials, Inc.
HEALTH HAZARDS: Possible cancer hazard if inhaled and may cause allergic reaction.

Inhalation: The National Toxicology Program has listed nickel and nickel oxide as possible cancer hazards. The International Agency for Research of Cancer concluded there was sufficient evidence that nickel refining was carcinogenic to humans and limited evidence that nickel and certain nickel compounds were carcinogenic to humans. IARC could not state with certainty which forms of nickel are human carcinogens but said "...metallic nickel seems less likely to be so than nickel subsulphide or nickel oxides..." The inhalation of nickel oxide, even at high concentrations, and of nickel powder has not resulted in an increased incidence of malignant tumors in rodents. Studies of workers exposed to nickel powder and to dust and fume generated in the production of nickel alloys and of stainless steel have not indicated a respiratory cancer hazard.

Inhalation of airborne nickel powder at concentrations fifteen times the PEL irritated the respiratory tract in rodents. Inhalation of nickel oxide impaired long-term lung clearance in rats and at concentrations of fifty times the PEL, produced pneumoconiosis in hamsters.

Skin contact: Repeated contact with metallic nickel can cause nickel sensitivity resulting in allergic skin rashes.

Wounds: Nickel powder and nickel oxide have caused tumors at the site of injection in rodents. However, studies of nickel-containing prostheses do not suggest a significant risk for humans.

Ingestion: Nickel metal and nickel oxide have low oral toxicities: their oral rat LD_{50} are 9000mg/kg and 5000mg/kg respectively. The U.S. Food and Drug Administration concluded that nickel and its inorganic compounds are not carcinogenic when ingested.

Preexisting Conditions: Sensitized individuals may experience an allergic skin rash.
ADDENDUM TO MATERIAL SAFETY DATA SHEET
REGULATORY STATUS

THIS ADDENDUM MUST NOT BE DETACHED FROM THE MSDS IDENTIFIES SARA 313 SUBSTANCE(S)

Electroless Nickel Plating Strike

SARA Section 302 EHS RQ: Reportable Quantity of Extremely Hazardous Substance, listed at 40 CFR 355.
SARA Section 302 EHS TPQ: Threshold Planning Quantity of Extremely Hazardous Substance. An asterisk (*) following a threshold Planning Quantity signifies that if the material is a solid and has a particle size equal to or larger than 100 micrometers, the Threshold Planning Quantity + 10,000 LBS.
SARA Section 313 Chemicals: Toxic Substances subject to annual release reporting requirements listed at 40 CFR 372.63.
CERCLA Sec 103: Comprehensive Environmental Response, Compensation and Liability Act (Superfund). Releases to air, land or water of these hazardous substances which exceed the Reportable Quantity (RQ) must be reported to the National Response Center (800-424-8802); Listed at 40 CFR 302.4
RCRA: Resource Conservation and Reclamation Act. Commercial chemical product wastes designated as acute hazards and toxic under 40 CFR 261.33
