Section 2. Hazards Identification

<table>
<thead>
<tr>
<th>Physical state</th>
<th>Liquid.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OSHA/HCS status</td>
<td>This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).</td>
</tr>
<tr>
<td>Emergency overview</td>
<td>DANGER! POISON! MAY BE FATAL IF INHALED OR SWALLOWED. CAUSES EYE AND SKIN BURNS. CAUSES SEVERE RESPIRATORY TRACT IRRITATION. CONTAINS MATERIAL WHICH CAUSES DAMAGE TO THE FOLLOWING ORGANS: LUNGS, RESPIRATORY TRACT, SKIN, EYE, LENS OR CORNEA. Do not ingest. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.</td>
</tr>
<tr>
<td>Routes of entry</td>
<td>Dermal contact. Eye contact. Inhalation. Ingestion.</td>
</tr>
<tr>
<td>Potential acute health effects</td>
<td>Eyes: Corrosive to eyes.  Skin: Corrosive to the skin.  Inhalation: Very toxic by inhalation. Severely irritating to the respiratory system.  Ingestion: Very toxic if swallowed. May cause burns to mouth, throat and stomach.  Carcinogenic effects: No known significant effects or critical hazards.  Mutagenic effects: No known significant effects or critical hazards.  Teratogenicity / Reproductive toxicity: No known significant effects or critical hazards.</td>
</tr>
<tr>
<td>Medical conditions aggravated by over-exposure</td>
<td>Repeated skin exposure can produce local skin destruction or dermatitis. Repeated or prolonged exposure to the substance can produce lung damage. Repeated or prolonged contact with spray or mist may produce chronic eye irritation and severe skin irritation. Repeated or prolonged exposure to the substance can produce target organs damage.</td>
</tr>
</tbody>
</table>

ACS Grade 25-35%
Ultra Grade 20-25%

Section 4. First Aid Measures

Eye contact : Get medical attention immediately. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Chemical burns must be treated promptly by a physician.

Skin contact : Get medical attention immediately. Flush contaminated skin with plenty of water. Continue to rinse for at least 10 minutes. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing or wear gloves. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Inhalation : Get medical attention immediately. Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion : Get medical attention immediately. Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing or wear gloves.

Section 5. Fire Fighting Measures

Flammability of the product : No specific hazard.
Products of combustion : These products are nitrogen oxides (NO, NO₂ etc.).

Extinguishing media
Suitable : Use an extinguishing agent suitable for the surrounding fire.
Not suitable : None known.

Special exposure hazards : Not available.
Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Section 6. Accidental Release Measures

Personal precautions: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up: If emergency personnel are unavailable, contain spilled material. For small spills, add absorbent (soil may be used in the absence of other suitable materials), scoop up material and place in a sealable, liquid-proof container for disposal. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal.

Section 7. Handling and Storage

Handling: Do not ingest. Do not get in eyes or on skin or clothing. Keep container closed. Use only with adequate ventilation. Do not breathe vapor or mist. Wash thoroughly after handling.

Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure Controls/Personal Protection

Product name: Ammonia

Exposure limits

ACGIH TLV (United States, 1/2005).
- STEL: 24 mg/m³ 15 minute/minutes. Form: All forms
- STEL: 35 ppm 15 minute/minutes. Form: All forms
- TWA: 17 mg/m³ 8 hour/hours. Form: All forms
- TWA: 25 ppm 8 hour/hours. Form: All forms

NIOSH REL (United States, 12/2001).
- STEL: 27 mg/m³ 15 minute/minutes. Form: All forms
- STEL: 35 ppm 15 minute/minutes. Form: All forms
- TWA: 18 mg/m³ 10 hour/hours. Form: All forms
- TWA: 25 ppm 10 hour/hours. Form: All forms

OSHA PEL (United States, 8/1997).
- TWA: 35 mg/m³ 8 hour/hours. Form: All forms
- TWA: 50 ppm 8 hour/hours. Form: All forms

- STEL: 27 mg/m³ 15 minute/minutes. Form: All forms
- STEL: 35 ppm 15 minute/minutes. Form: All forms

Consult local authorities for acceptable exposure limits.

Engineering measures: Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Recommended: splash goggles, face shield

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Body: Recommended: safety apron

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Continued on Next Page
Section 8. Exposure Controls/Personal Protection

Hands : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Recommended: nitrile rubber

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and Chemical Properties

Physical state : Liquid.
Boiling/condensation point : The lowest known value is 99.9°C (211.8°F) (Water).
Melting/freezing point : May start to solidify at -0.1°C (31.8°F) based on data for: WATER.
Relative density : The only known value is 0.682 (Water = 1) (Ammonia).
Evaporation rate : 0.36 (Water) compared with (n-BUTYL ACETATE=1)

Section 10. Stability and Reactivity

Stability and reactivity : The product is stable.
Hazardous polymerization : Will not occur.

Section 11. Toxicological Information

Toxicity data
Chronic effects on humans : Contains material which causes damage to the following organs: lungs, upper respiratory tract, skin, eye, lens or cornea.
Other toxic effects on humans : Extremely hazardous in case of ingestion, of inhalation (lung irritant). Very hazardous in case of skin contact (corrosive), of eye contact (corrosive). Hazardous in case of inhalation (lung corrosive).
Specific effects
Carcinogenic effects : No known significant effects or critical hazards.
Mutagenic effects : No known significant effects or critical hazards.
Teratogenicity / Reproductive toxicity : No known significant effects or critical hazards.
Sensitization
Ingestion : May cause burns to mouth, throat and stomach.
Inhalation : Severely irritating to the respiratory system.
Eyes : Corrosive to eyes.
Skin : Corrosive to the skin.

Environmental precautions : Very toxic to aquatic organisms.
Section 12. Ecological Information

Products of degradation: These products are nitrogen oxides (NO, NO₂ etc.).
Toxicity of the products of biodegradation: The products of degradation are less toxic than the product itself.

Section 13. Disposal Considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Local regulations may be more stringent than regional or national requirements.

The information presented below only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Section 15. Regulatory Information

United States

HCS Classification: Highly toxic material
                      Corrosive material
                      Target organ effects

U.S. Federal regulations: TSCA 8(b) inventory:
                         SARA 302/304/311/312 extremely hazardous substances: Ammonia
                         SARA 302/304 emergency planning and notification: Ammonia
                         SARA 302/304/311/312 hazardous chemicals: Ammonia
                         SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Ammonia:
                                           Sudden release of pressure, Immediate (acute) health hazard
                         Clean Water Act (CWA) 307: No products were found.
                         Clean Water Act (CWA) 311: Ammonia
                         Clean Air Act (CAA) 112 accidental release prevention: Ammonia
                         Clean Air Act (CAA) 112 regulated flammable substances: No products were found.
Section 15. Regulatory Information

Clean Air Act (CAA) 112 regulated toxic substances: Ammonia

### SARA 313

<table>
<thead>
<tr>
<th>Form R - Reporting requirements</th>
<th>Product name</th>
<th>CAS number</th>
<th>Concentration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supplier notification</td>
<td>Ammonia</td>
<td>7664-41-7</td>
<td>20 - 35</td>
</tr>
</tbody>
</table>

SARA 313 notifications must not be detached from the MSDS and any copying and redistribution of the MSDS shall include copying and redistribution of the notice attached to copies of the MSDS subsequently redistributed.

### State regulations

- Pennsylvania RTK: Ammonia: (environmental hazard, generic environmental hazard)
- Massachusetts RTK: Ammonia
- New Jersey: Water; Ammonia

### Canada

- WHMIS (Canada): Class D-1B: Material causing immediate and serious toxic effects (Toxic).
- Class E: Corrosive material

- CEPA DSL/CEPA NDSL: CEPA DSL: Water; Ammonia

This product has been classified according to the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

### EU regulations

#### Hazard symbol/symbols

- R23- Toxic by inhalation.
- R34- Causes burns.
- R37- Irritating to respiratory system.
- R50- Very toxic to aquatic organisms.

#### Risk phrases

- S1/2- Keep locked up and out of the reach of children.
- S26- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- S29- Do not empty into drains.
- S36/37/39- Wear suitable protective clothing, gloves and eye/face protection.
- S45- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
- S61- Avoid release to the environment. Refer to special instructions/Safety data sheets.
- S63- In case of accident by inhalation: remove casualty to fresh air and keep at rest.

### International regulations

#### International lists

- Australia (NICNAS): Water; Ammonia
- China: Ammonia
- Germany water class: Ammonia
- Japan (METI): Water; Ammonia
- Korea (TCCL): Water; Ammonia
- Philippines (RA6969): Water; Ammonia

Section 16. Other Information

Label requirements: DANGER!
- POISON!
- MAY BE FATAL IF INHALED OR SWALLOWED.
- CAUSES EYE AND SKIN BURNS.
- CAUSES SEVERE RESPIRATORY TRACT IRRITATION.
- CONTAINS MATERIAL WHICH CAUSES DAMAGE TO THE FOLLOWING ORGANS: LUNGS, RESPIRATORY TRACT, SKIN, EYE, LENS OR CORNEA.

National Fire Protection Association (U.S.A.):
- Flammability: 1
- Health: 3
- Instability: 0
- Special:

Other special considerations: Ammonium Hydroxide Solution is recognized by CAS 1336-21-6
