

ACI Certification Update – John Nehasil

MTRAC – Big Rapids, MI

July 2025

ACI Certification continues to rewrite Study materials for its certification programs. Currently available materials testing program workbooks are:

- CP-1 Concrete Field Testing Technician: English and Spanish
- CP-3 Self Consolidating Concrete Testing Technician
- CP-18 Concrete Laboratory Testing Technician – Level 2
- CP-19 Concrete Strength Testing Technician: English and Spanish

These rewritten study guides will be released in 2025:

- CP-45 Aggregate Testing Technician – Level 2
- CP-46 Aggregate Base Testing Technician (ASTM based)
- CP-47 Aggregate Base Testing Technician (AASHTO based)
- CP-92 Nondestructive Testing Specialist - Concrete Strength

ACI has launched the GFRP Reinforcing Bar Inspector Program:

<https://www.concrete.org/certification/certificationprograms.aspx?m=details&pgm=Reinforcing%20Bar%20Inspection&cert=GFRP%20Reinforcing%20Bar%20Inspector>

ACI Certification is currently developing the following programs:

- ACI 562 Design Professional (Outside of the U.S. only at this time)
- Slip Form Paving Finisher (ACPA)

All three ACI Resource Centers (SoCal, Midwest, and Mid-Atlantic) are open and offer most ACI Certification programs and customized training. These facilities are available for use by industry groups by contacting the RC Manager of the desired location. For that and more information on the RCs, please visit:

<https://www.concrete.org/certification/resourcecenters.aspx>

Note that the Midwest RC will be relocating in Fall 2025 to Wood Dale, two miles south of the current location and still near Chicago O'Hare Airport.
