

**PARTNERS IN TRANSPORTATION LEARNING CONFERENCE  
KANSAS CITY MARRIOTT – COUNTRY CLUB PLAZA  
KANSAS CITY, MISSOURI  
OCTOBER 31, 2004 – NOVEMBER 3, 2004**

To: All Technical Training Coordinators

From: Transportation Curriculum Coordination Council (TCCC)  
National Transportation Training Directors (NTTD)

Sustaining a competent transportation workforce is a national priority. Many states, regions, and organizations are working to train and certify state employees, contractors, producers, and other agency's personnel. Although working toward similar goals these groups often have acted independently to develop training materials and educate employees.

To discuss common ground we share and learn how we may better work together to reach similar goals, the National Transportation Training Directors (NTTD), Transportation Curriculum Coordination Council (TCCC), and the Technical Training Coordinators are planning a joint meeting in Kansas City, Missouri October 31- November 3, 2004. This joint venture is an opportunity for training professionals from all disciplines to meet and share information. Benefits of this meeting include:

- Avoid duplication of effort
- A forum to share technical training information among states
- Develop new DOT resources for training
- Share adult training techniques to make training offered more effective
- Save valuable state resources by sharing with other DOT trainers

The conference will entail both combined sessions and allow time for individual group topics of interest.

The registration process will vary by group due to differences in agendas. The registration application, meeting and hotel information will be mailed in the near future, so mark your calendars and plan to join us for an opportunity to benefit your state's educational future!

For those of you unfamiliar with the TCCC please visit our web site at <http://www.nhi.fhwa.dot.gov/tccc/> and refer to the enclosed Focus article for information.

Please pass this information on to others in your organization or state that may be interested.
