Shelter-in-Place Considerations for Life-Threatening Incidents

This information is designed to encourage building occupants to develop an individual plan based on potential life threatening incidents such as a shooting on campus. Actions should be based on situational awareness. React to Purdue ALERT information as well as what you see and hear in your general area. See EP website for more info

**Get Set**...stay alert; be prepared to implement your plan. A life threatening incident has occurred on the West Lafayette campus; incident location is near me but not in my building.

- Implement all Get Ready actions.
  - If the threat is ongoing or you feel your safety is in jeopardy, implement your department or building specific actions.
  - Be ready to get out/escape or shelter in safe area based on situational awareness.

- Prepare to escape if that is best option.

**Go**...stay calm and activate your plan. A life threatening incident has occurred on the West Lafayette campus; incident location is in my building or I feel my safety is in jeopardy (location of perpetrator is unknown).

- Based on situational awareness, immediately:
  - Decide if you can escape; if possible get out of the building to a safe location.
  - If you can’t escape, then shelter in a lockable area and/or a room that you can secure or barricade.
  - As an absolute last resort, consider taking action if your safety is in jeopardy.

- Execute your plan as indicated in General Actions to the left.
