Forensic Sciences Minor Update

Summer 2014:  ENTM 21800 will be offered.
Introduction To Forensic Science - 22403 - ENTM 21800 - 001

--------------------------

Fall 2014
ENTM 41800 will not be offered. Students who wish to complete the minor will have this option:
YDAE 49100 (Section 2) Forensic Science and Ethics; CRN 67024 will substitute for ENTM 41800 for completion of the minor. (Note: YDAE 49100 is a temporary number. ONLY the offering “Forensic Science and Ethics” substitutes for ENTM 41800. Other titles under the YDAE 49100 number in the past, present or future do not substitute.)

New Laboratory Course in Fall 2014:
ENTM 29400 /ENTM 21801 Intro to Forensic Science Lab Cr 1 (Lab; Multiple sections)
Restrictions: ENTM 21800 co-req or pre-req
Not available for students who have completed ENTM 31800.
Anticipated Course Number Change:
Current students should register for a 29400 section during Spring registration to preserve their priority.
Pending Approval, we anticipate ENTM 29400 will be re-numbered ENTM 21801 after the end of Spring Semester but before STAR. We expect STAR students will register directly into ENTM 21801.

Forensic Science Minor Students, Fall 2014 (pending final approval) Students should enroll in:
ENTM 21800 (3 cr) Intro to Forensic Science
AND a section of ENTM 29400 or ENTM 21801 (Intro To Forensic Science Lab, 1 cr).

Students who have taken ENTM 21800 in previous semesters may enroll in ENTM 29400 or 21801 in Fall 2014 for credit (Optional; Minor requirement for the lab will not be retroactive). Students who have completed ENTM 31800 are NOT eligible to enroll in ENTM 29400 or ENTM 21801, Intro to Forensic Science Lab for credit because much of the material would be duplicative of ENTM 31800.

ENTM 21800 is still available without the lab to meet UCC/STS requirement.

Why?
The proposed Forensic Science Minor revisions were recommended by Director of the Forensic Science Program, Trevor Stamper after conversations with students, advisors and faculty across campus. Revisions have been unanimously approved by the Forensic Sciences Advisory Committee, the ENTM faculty and are pending approval by the College of Agriculture Faculty in April 2014. We will send further details once changes are official. These changes affect only the
The minor will still require 9 credits of selectives (List as revised in January 2014 is available [here](https://ag.purdue.edu/oap/Pages/majors.aspx?sid=41)).

**The new Forensic Science Minor** (proposed for Fall 2014) will increase from 19 to 20 credits and will include 3 new core courses in Fall 2014 (pending approval):

ENTM 22810 4 cr (3 lec 1 lab) Forensic Investigation (offered Fall and Summer)
ENTM 22820 4 cr (3 lec 1 lab) Forensic Analysis (offered Spring)
YDAE 37100 3 cr (lec) Forensic Science and Ethics (offered Fall)

**Meeting the New Requirements (Fall 2014 and forward; pending):**
The following combinations will meet the core courses requirement.
ENTM 22810, ENTM 22820, YDAE 37100
or ENTM 21800, 31800 and 41800
or ENTM 21800, 31800 and YDAE (49100 Section 2 Only) Forensic Science and Ethics
or ENTM 21800, 31800 and YDAE 37100 Forensic Science and Ethics
or ENTM 21800 (Taken before Fall 2014), ENTM 22820 and YDAE 37100
or ENTM 21800 (Fall 2014), ENTM 21801, ENTM 22820 and YDAE 37100

The Minor requires 9 additional credits of selectives.

These combinations will put students on the new track starting in Fall 2014 and accommodate students who have completed some of the minor core courses prior to Fall 2014 by providing a smooth path to meeting the proposed new Forensic Sciences Minor requirements.
