# PROCESS SAFETY LEADERSHIP

# CountryMark Mt Vernon Refinery

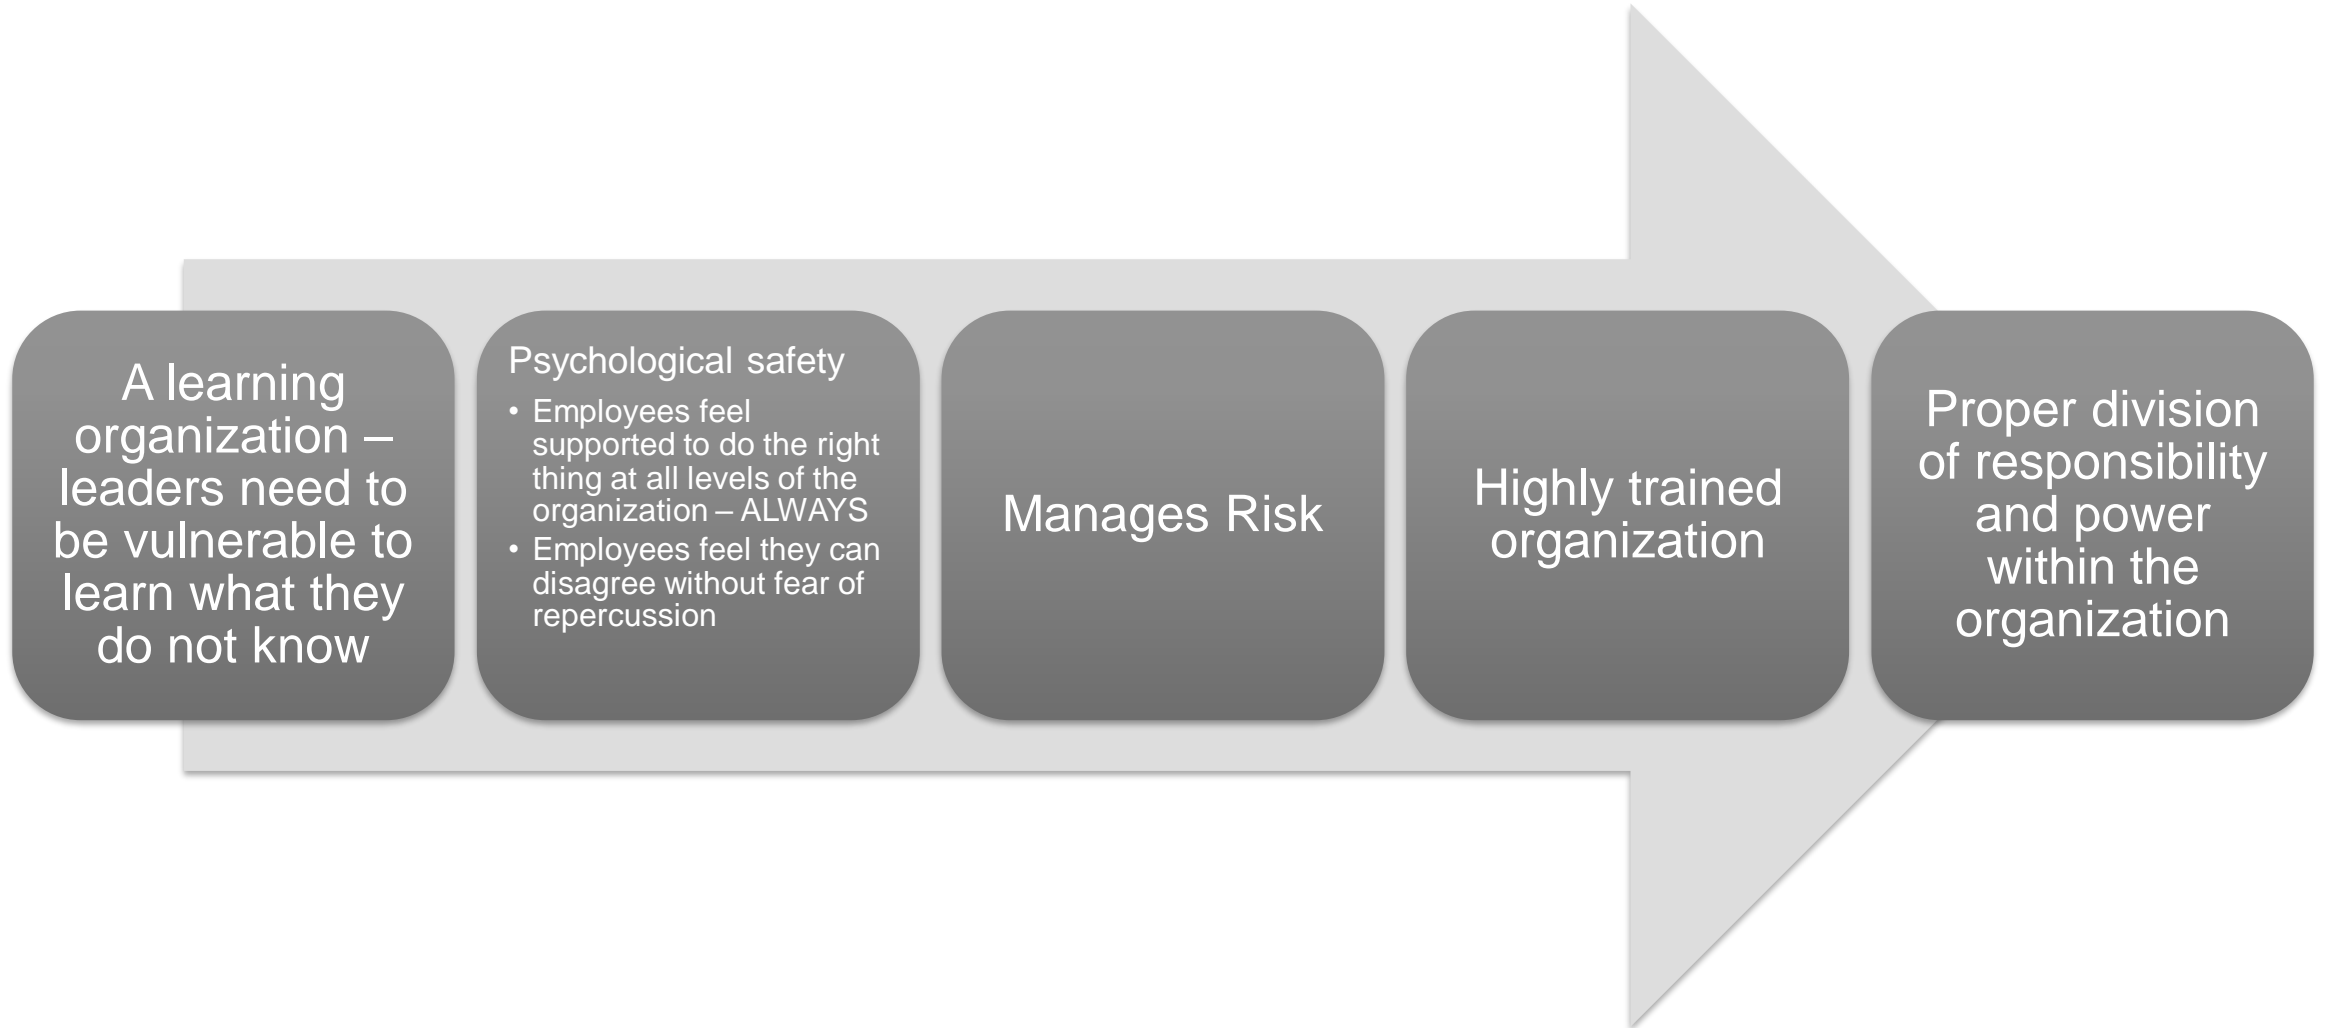

# Dilemmas and Culture

# Characteristics of Process Safety Leaders

- Makes unpopular decision with no regard to personal consequences
- Tactful intervention – the why
- Supports Process Safety action items as priority – ALWAYS
- Supports decision making within the organization – ALWAYS
- It is just “news”

# Process Safety Culture

# Leaders do not have IPF's

We are in the business of people – we just happen to make products that fuel the world.

Process Safety events have the potential of affecting multiple employees and entire communities

The goal – every hard hat goes in a locker at night...
