

Purdue Pilots Inc. meeting

October 6, 2009. 7:00 PM. Physics 111

Attendance list is below. Please send corrections to Rick at westerman@purdue.edu

President Grayson Steding opened the meeting by showing the video that was created by "Friday Night Tailgate" with the help of Grayson and James Polivka. The video is accessible via our web site. We may also get some the raw footage. The in-flight footage should be very nice.

Grayson reminded everyone about the rate increase that went into effect Oct. 1st.

There were no new ratings or certificates.

Financial report: Same as last month because Hannis did not have any new data.

Maintenance report: Nothing to report. A question was brought up as to hold up the passenger's side visor in the Warrior. We may get this fixed. A hole in the fiberglass of the Archer was reported. However this hole has been around for some time.

ASOR report: The inauguration of the Niswonger Aviation building went well and people were impressed with PPI. Brian took some photos which we viewed.

IMC club formation: Still in the works. We need to round up a CFII.

Better cross-country form. Grayson wants to have a better form. Drop some unneeded questions. Ask about personal limits especially wind limits. Where to parking will be done at the destination.

Brian Kozak gave a presentation of his trip over to Germany to see former president Thomas D. They did a day trip of flying a Diamond from Germany to Austria, bicycling into Switzerland, walking back to Austria (the bike had a flat tire) and then a return trip to Germany. Brian had both photos, sectional charts and videos. It was a very nice presentation.

Next meeting is October 21, 7:00 PM, Phys 111.

PPI Attendance list for Oct. 6, 2009

Clifton, Chris
Cooper, Jim
Fenstermaker, Kevin
Huang, Rosemary
Kozak, Brian
Juliano, Thomas
McPherson, Brice (was also at Sep 23rd meeting but not marked as such)
