-This program and what kind of equipment we would purchase is dependent on member interest.

-FAA medical Reform: the purpose is intended to keep the decision to fly between you and a physician without FAA involvement.

-pilot must have held a med certificate in the past 10 years, must not have been suspended, revoked etc.

-No more medical every 2 or 5 years.

-students still must take a physical once and then every 24 months take a medical evaluation course

-must have comprehensive exam every 4 years.

-This becomes active May 1<sup>st</sup> and applies to 3<sup>rd</sup> class certificates only. Also affects the type of aircraft you can fly, but for PPI purposes should not affect anyone.
