

Purdue Pilots Inc. 02/21/17 Meeting Minutes

TREASURY:

-Maintenance on trinity was heavy this month. Spent 3K on trinity, made 6K

PRESIDENT:

From Purdue Aviation Ben Bushnell: Information about spins.

-can be considered a regular maneuver if done correctly.

-Required to become a CFI

-Depends on weight and balance.

-Recovering from a spin= PARE

-Power, Ailerons to neutral, full opposite rudder, forward elevator

Air Race Classic: We want to put together a PPI Team

-Go from point A to B as fast as you can, all women, 2 to 3 team members. For our case, 2 people, with a dedicated ground team (can also be guys). We want to see if we can raise the 5000 dollars necessary.

This also helps promote women in aviation.

-There is also a slack channel for this if you are interested, otherwise contact Nicoletta.

-There is also a new slack channel called aircraft availability, which will be used if someone cancels their flight so someone else can fly

EVENTS:

-Study Group is in Armstrong 3115 on Thursdays at 7:30PM. There is a slack channel dedicated for this.

-Edegelea STEM night is Thursday, march 9th, 5-8 PM. We will be promoting aviation and Purdue to younger kids. There is free pizza! We can always use more volunteers, contact Geoffrey for more info.

ALUMNI/PR:

-Thanks for everyone who has done the member spotlight. Send Geoffrey pictures of you flying so we can post them on our social media channels.

-Send Mariah any interesting stories you have from your flying experiences. Our Alumni love hearing what you guys are up to.

-Our first dinner flight is too late to sign up for. But April 2nd will be the next opportunity for a dinner flight. Please bring 20 dollars to our next meeting so we can get you on the roster. We have to file an event plan for these, so it's important we hear from you earlier.

Maintenance

- As always if you notice anything wrong with the plane, please squawk them so we can fix it.
- Carpeting in 11942 will be removed since Cessna does not make a replacement panel. We will look into third party vendors for eventual replacement.
- Maintenance committees will be busy since it is getting warm. There will be bugs and grime all over the wings and leading edges. The aircraft will need to be cleaned. Join the Maintenance committee channel on slack for more info.
- Please keep our planes clean! Throw trash in the trash can when you get back on the ground even if it isn't yours. We want to keep the planes nice for everyone.

Meeting adjourned 7:55PM
