

# JOIN THE PHD PROGRAM IN PURDUE SPEECH, LANGUAGE, AND HEARING SCIENCES

- Be part of one of the largest and highest-ranked programs in the US
- Learn from excellent faculty using cutting-edge methods
- Experience outstanding facilities and resources
- Flourish in a supportive training environment

## IMPORTANT TO KNOW!

- All PhD students are **fully-funded for at least 4 years** through research/teaching assistantships, two training grants, and individual fellowships!
- Funds available for research projects and travel to conferences.
- We welcome students to our program from a range of academic backgrounds, including SLHS, Psychology, Neuroscience, Kinesiology, Linguistics, Public Health, Biomedical Engineering, Human Development, etc. A clinical degree is not required to enter or complete the program.

## WHY PURDUE?

- Students receive individually tailored training from faculty with diverse and interdisciplinary backgrounds.
- We offer classes on how to write for academic journals and on how to write grants.
- Students are encouraged to build interdisciplinary skills to learn cutting-edge research methods.
- We have an established record of mentoring students from diverse backgrounds to become successful researchers.
- Purdue University provides a vibrant environment in which to live and learn - enjoy world-class performances, art fairs, farmer's markets, sporting events, a variety of restaurants, and more!

*We are committed to preparing the next generation of scientists that reflects the diversity of our national and global community. We welcome applicants from diverse and underrepresented backgrounds.*
