

Agricultural & Biological Engineering Graduate Students Association

Distinguished Professor Seminar Series

Wednesday, January 20th 2016
noon — 1pm ABE Room 301

Free food!

Dr. Hertel is Distinguished Professor of Agricultural Economics at Purdue University, where his research focuses on the economy-wide impacts of global trade and environmental policies. He is the founder and Executive Director of the Global Trade Analysis Project (GTAP) which now encompasses more than 10,000 researchers in 150 countries around the world.

Professor Hertel's most recent research has focused on the impacts of climate change and mitigation policies on global land use and poverty. In this presentation Dr. Hertel will provide an overview of the issues and then dive deep down into the valuation of a specific technology using this same framework discussed earlier.

Presented by:

Dr. Thomas Hertel

**Distinguished Professor
Agricultural Economics
Purdue University**

Free food Provided
