

PROMOTING THE SOCIAL-COMMUNICATION AND PLAY SKILLS OF YOUNG CHILDREN WITH AUTISM SPECTRUM DISORDER

Thursday, March 28

6:00 P.M. EST

LWSN, Rm 1142

305 N University St, West Lafayette, IN 47907

The Purdue Autism Seminar Series welcomes Brian Boyd, PhD, to discuss the importance of working on the foundational social-communication and play skills of young children with ASD and the need to ensure every child with ASD has the Means, Motivation, and Opportunity (MMO) to communicate and play with others.

Brian Boyd, PhD

Director, [Juniper Gardens Children's Project](#)
Associate Professor, *Applied Behavioral Science*
University of Kansas

Brian A. Boyd, Ph.D. focuses on the development and evaluation of evidence-based, behavioral interventions for children with ASD, and understanding the impact of restricted, repetitive behaviors on the ability of these children to participate in their environment. Dr. Boyd has published extensively on interventions that are feasible for clinicians and caregivers to implement and effective at improving children's outcomes. Various federal agencies, including the Institute of Education Sciences and the National Institutes of Health, have funded his research.
