

Purdue Lectures in Ethics, Policy, and Science

THE MORAL DIMENSIONS OF GERRYMANDERING

Despite knowing the legal opinions regarding gerrymandering, do we fully know the moral and ethical opinions around gerrymandering? It seems that we know that gerrymandering is illegal, but what about gerrymandering makes it *unethical* or *immoral*?

Thursday, November 7th | 4:00 PM – 5:30 PM | Grissom Hall 102

This talk is free and open to the public. Free Pizza!

Dr. Aidan Kestigian is the program manager for the Metric Geometry and Gerrymandering Group at Tufts University. This group uses geometry and computing to better understand gerrymandering and its threat to the democratic process within the United States. Dr. Kestigian's work focuses specifically on the ethical and moral ramifications of gerrymandering. Her work takes an interdisciplinary approach in understanding the complex ethical and moral problem of redistricting on racial and partisan lines. Dr. Kestigian will give a talk entitled: "Philosophy of Redistricting" which will address and map out the moral and ethical implication of gerrymandering.

The Purdue Lectures in Ethics, Policy, and Science are supported with the generous sponsorship from:
