Data Science Education Ecosystem

January 31, 2019

8:30 a.m. to 1:30 p.m.

Lunch provided

Stewart Center 214 ABCD

Please join Purdue colleagues on Thursday, Jan. 31, to learn about on-going efforts to build a Data Science for All ecosystem.

The Data Science Education Summit will bring together many of the concurrent efforts in data science education across the Purdue campus, including those involved in the Education Ecosystem awarded projects, faculty and staff engaged in data science education efforts supported by the academic units, and individuals with an interest in data science education.

The goals of the Summit are to:

- Facilitate communication among all of the on-going DS education efforts,
- Identify areas of cooperation and foster cross-disciplinary partnerships to minimize redundancy,
- Formulate plans for university wide next steps that will shape priorities for the next Data Science Education Ecosystem request for proposal (RFP).

Registration Required
