

# HEALTH EQUITY & PUBLIC SAFETY DATA CHALLENGE

## USING DATA TO IMPROVE THE HEALTH OUTCOMES OF JUSTICE-INVOLVED ADULTS

Each year over 8,000 Hoosiers are released from prison and returned to communities throughout the state. Returning Citizens face countless challenges to receive access to care they need to successfully transition back to post-incarceration life. Too often, the result is substance abuse, frequent emergency room usage, or recidivation.

Help us improve care for this vulnerable population. Join the Indiana Family and Social Services Administration and Department of Correction for the first-ever **Health Equity & Public Safety Data Challenge**. Hosted by the Purdue Data Mine and open only Purdue students and faculty, this first-of-its-kind competition is a unique opportunity to:

Explore real world data

Gain valuable technical skills, and

Provide insights to government and industry leaders

Data Challenge Opens: **August 22<sup>nd</sup>**

Final Presentations and Awards Ceremony: **November 4<sup>th</sup>**
