Scientific Connections, Inc. is a company that provides career services and retained search for scientists and others in STEM disciplines. Merle launched Scientific Connections in 2017 as a way to utilize and share the professional experiences she gained through more than fifteen years of leadership in the fields of both scientific sales and scientific staffing. Through her work with scientists and companies that hire scientists, it became abundantly evident that a gap existed between amazing, brilliant candidates and access to rewarding, inspiring scientific industry career opportunities. It is here, within that realization, that Scientific Connections was born.

Merle brings a chemistry degree from DePaul University and is an MBA Presidential Scholar candidate with Lake Forest Graduate School of Management. Under the auspices of Scientific Connections, and the nearly two years in business to date, she has provided career support to over 100 clients both in the Midwest and nationally. She frequently provides workshops and is active with numerous university graduate programs. Merle is learning Italian and fluently speaks corporate, resume, and science.

Scientific Connections. We build bridges for your career. [Linkedin.com/in/merleward](https://www.linkedin.com/in/merleward)
