# CAREER PANEL DISCUSSION

WITH SCIENTISTS and  
CONSERVATION PROFESSIONALS  
FROM THE NATURE CONSERVANCY.

Sponsored by the Center for the Environment and the Department of Forestry and Natural Resources; moderated by Linda Prokopy, FNR

## Randy Dell

Randy Dell is the Agriculture Strategy Manager for the Nature Conservancy, where he focuses on integrating science, policy and economics for scalable conservation delivery approaches. Randy has a B.A. in Economics from Michigan State University and a M.S. in Agricultural and Resource Economics from Oregon State University.

## Seth Harden

Seth Harden is a proud Boilermaker, earning his BS in Forestry in 2010. He leads freshwater conservation work across the northern half of Indiana as the Upper Wabash River Project Director. He spends much of his time building collaborations with public and private partners to advance TNC strategies and objectives.

## Yuta Masuda

Yuta Masuda is a Policy Scientist at The Nature Conservancy. His research explores the intersection of international development policy, environmental policy, and social policy, with an emphasis on gender, land tenure security, sustainable development, quantitative methods, and microeconomics.

## Sheila Reddy

Sheila Reddy is a Senior Economist and Strategy Advisor-Behavioral Insights. Her research helps bring economic and behavioral approaches into conservation strategies. Sheila has worked on issues related to fisheries, poverty, coastal hazards, freshwater scarcity, urban conservation, and agriculture.
