

DRY

Sources of duplication:

Impatience

Other developers

Inadvertent

copy-paste feels faster than ^{creating} helper

Types of duplication

functionality (eg. strdup)

constants

other "information"
(in a broad sense)

← put in one place in header file
if likely to use multiple places
and not 100% universal

✗ #define NEWLINE '\n'

○ #define HW_NICKNAME "HW08"
