

Objectives - Wed 1/15/2020

□ Development tools: Vim

- Concepts
- Autocomplete
- Search / replace
- Renaming variables
- Tabs
- Splits

☞ Ask questions not Piazza (not by email).

Use email only for confidential matters that you don't want even the TAs to see.

☞ Bring your reference sheet to every class.

Vim – autocomplete + multiple files

□ Autocomplete

AQ shortcut ↴

- Ctrl-P ← autocomplete – up in list (▲) F3
- Ctrl-N ← autocomplete – down in list (▼) F4

□ Tabs

- :tabe *filename* ← open file in tab F2
- «click» ← switch to next tab «tab»

□ Splits

- :split *filename* ← open file in horizontal split (≡)
- :vs *filename* ← open file in vertical split (⌚)
- :diffsplit *filename* ← compare to file in vertical split (⌚)
- Ctrl-W Ctrl-W or «click» ← switch to next split F6

Vim – renaming a variable
