

ECE 477 Digital Systems

Senior Design Project

Guideposts

Week 11

Last Week (Week 11)

- Homework 8: Midterm Peer Reviews
 - Provided confidential, detailed feedback on how your fellow team members are doing
- Homework 9: Software Design Considerations
 - Overall organization of code (flowcharts, function call structures)
 - Discussion of embedded source code
 - Peripheral utilization and memory maps

This Week (Week 12)

- Homework 10: Patent Liability Analysis
 - Due Friday at 12am (midnight)
 - Analysis of legal issues related to your project
 - Welcome to use any analysis you may have already done PROVIDED THAT it still pertains to your project (and any changes you may have made to your project)

This Week (Week 12)

- Mandatory Lab Session 8:
 - Wednesday at assigned TCSP session time in EE061/EE063 (8am and 12pm)
 - Discussion of software, prototyping, and general progress
 - All students are expected to be on time and remain in lab for the entirety of their mandatory lab session
 - Students who are late will be marked as late

Next Week (Week 13)

- Homework 11: Reliability and Safety Analysis
 - Discuss of robustness and durability of project
 - Discussion of safety concerns and potential for liability
- Project montage time
