

## **ECE 477 General Homework Guidelines**

- FOLLOW OUTLINE
- Number references [1], [2], ... and cite them in body of text, being sure to use IEEE format. If unsure about format, there are plenty of references. You can also try the engineering library. REMEMBER – just because the references were written a certain way on a HW example does NOT mean they are correctly done
- Number and caption all figures and tables  
(e.g., Figure 1. Caption for this figure.)
- Figures should be appropriately sized – readable but not excessively large.
- Use 12 point TIMES NEW ROMAN font, 18 point space (space-and-a-half)
- Page margins are 1” on all four sides.
- Text of the report, not including the coversheet, references, attachments, appendices, etc. should be no less than 3 pages and no more than 5 pages.
- Excessive “white space” will be severely penalized. Examples are excessive indentation and inter-paragraph spacing. Doing so to achieve the minimum of three pages will most likely result in less than the minimum grade on your assignment.
