## EE369: Discrete Math Propositional Logic

## Outline

- Logic
- Propositional Logic
- Well formed formula
- Truth table
- Tautology & Contradiction
- Proof System for Propositional Logic
- Deduction method
- Formalizing English arguments
- Text book chapters 1.1 and 1.2

1

## Logics

To define a *logic*, answer three questions:

- 1. What are the models?
- 2. What are the formulas?
- 3. Which formulas are true in which models?
- A logic is a formal system relating syntax (formulas) and semantics (models of the world).

3

A	В	$A \wedge B$	$A \lor B$	$A \rightarrow B$	$A \leftrightarrow B$	A'
T	Т	Т	Т	T	Т	F
T	F	F	T	F	F	
F	Т	F	Т	Т	F	Т
F	F	F	F	Т	Т	

DLE 1.5		
English Word	Logical Connective	Logical Expression
and; but; also; in addition; moreover	Conjunction	$A \wedge B$
or	Disjunction	$A \lor B$
If A, then B. A implies B. A, therefore B. B follows from A. A is a sufficient condition for B. B is a necessary condition for A.	Implication	$A \rightarrow B$
A if and only if <i>B</i> . A is necessary and sufficient for <i>B</i> .	Equivalence	$A \leftrightarrow B$
not A It is false that A It is not true that A	Negation	A'

Example proof	
<ul> <li>Hypotheses: C,</li> <li>Conclusion: A</li> </ul>	$B,  B \to (C \to A)$
1. <i>B</i>	premise
2. $B \rightarrow (C \rightarrow A)$	premise
3. $C \rightarrow A$ 4. $C$	1, 2, mp premise
5. A	3, 4, <i>mp</i>
