

ECE 661: Turnin Instructions

For this course we will be using electronic submission for all the homeworks. In order to use this system you will need an account on shay.ecn.purdue.edu. If you are in ECE you should already have this account. If you have another major, contact the TA and he will have an account created for you.

Instructions for using turnin:

1. If necessary copy your homework file to your account on shay.ecn.purdue.edu. If you don't know how to do this check out the cross-platform program FileZilla: <http://filezilla-project.org/>. On the quick connect bar, use *sftp://shay.ecn.purdue.edu* as the host and enter your Purdue username and password (there's no need to enter the port). You will then be able to drag and drop files from your local computer to shay.
2. Log into shay.ecn.purdue.edu using your Purdue career account
3. Change to the directory where your homework file is located, e.g.
cd ECE661/homework/
4. Type in the following command
turnin -c ece661 -p hw<homework number> <homework filename>
5. As an example, suppose your submitting homework 1 and your file is called "solution_to_hw1.pdf". Then you would run this command:
turnin -c ece661 -p hw1 solution_to_hw1.pdf
6. You should get a statement that says "Your files have been submitted to ece661, hw1 for grading". You can verify the submission by typing:
turnin -c ece661 -p hw<homework number> -v
This command will list the filename of the file you submitted.
7. The deadline for each homework is 11:59pm on the day it is due. If you miss the deadline, you can still e-mail your homework file to the TA who may give you full or reduced credit depending on the circumstances.
8. Note that you can resubmit a homework assignment as many times as you want up to the deadline. Each submission will overwrite any previous submission.
