

Some References for Shock-Shock and Shock/Boundary-Layer Interaction

1. Babinsky, H. and J. Harvey, ed., *Shock-Wave/Boundary-Layer Interactions*, Cambridge Univ. Press, Cambridge, 2011. A recent compendium of reviews by leading researchers in the field. Three of the articles are explicitly focused on the hypersonic case. Chapter 2 by Jean Delery does a very nice job discussing the fundamental physical concepts.
2. Arnal, Daniel and Jean Delery, *Laminar-Turbulent Transition and Shock Wave/Boundary Layer Interaction*, in *Critical Technologies for Hypersonic Vehicle Development*, proceedings of an RTO AVT Lecture Series at the Von Karman Institute, May 2004, published as RTO-EN-AVT-116.
3. Candler, G.V., *CFD Validation for Hypersonic Flight: Real Gas Flows*, AIAA Paper 2002-0434, January 2002.
4. Chang, P., *Control of Flow Separation*, Hemisphere, New York, 1976.
5. Delery, Jean M., *Shock wave/turbulent boundary layer interaction and its control*, Prog. Aerospace Sciences, v. 22, pp. 209-280, 1985.
6. Delery, J. and J.G. Marvin, *Shock-wave Boundary layer interactions*, AGARDograph No. 280, Feb. 1986, 216 pages.
7. Delery, Jean M., *Shock interaction phenomena in hypersonic flows, part II, Physical features of shock wave/boundary layer interaction in hypersonic flows*. Manuscript was handed out with a presentation at the AGARD Conference on Future Aerospace Technology in Service of the Alliance, Ecole Polytechnique, Palaiseau, France, 14-16 April 1997. However, article did not appear in AGARD CP-600 v. 3. Not clear if the final version was published.
8. Frame, Micheal J. and Mark J. Lewis, *Analytical Solution of the Type IV Shock Interaction*, J. of Propulsion and Power, v. 13, no. 5, pp. 601-609, 1997. Solves using method similar to Keyes, but obtains transmitted shock length using continuity and correlation for bow shock shape.
9. Green, J.E., *Interaction between shock waves and turbulent boundary layers*, Prog. Aerospace Sciences, v. 11, pp. 235-340, 1969.

10. Grasso, F, C. Purpura, B. Chanetz, and J. Delery, *Type III and type IV shock/shock interferences: theoretical and experimental aspects*, Aerospace Sci. and Tech., v. 7, pp. 93-106, 2003.
11. Hankey, W.L. Jr. and M.S. Holden, *Two-Dimensional Shock Wave-Boundary Layer Interactions in High Speed Flows*, AGARDograph number 203, AGARD, June 1975. 118 pages.
12. Holden, Micheal, Shirley Sweet, Joseph Kolly, and Gregory Smolinski, *A review of the aerothermal characteristics of laminar, transitional, and turbulent shock/shock interaction regions in hypersonic flows*, AIAA Paper 98-0899, January 1998.
13. Knight, Doyle, et al., *RTO WG10: CFD Validation for Shock Wave Turbulent Boundary Layer Interactions*, AIAA Paper 2002-0437, January 2002.
14. Mabey, D.G., *A Review of Scale Effects in Unsteady Aerodynamics*, Prog. Aerospace Sciences, v. 28, pp. 273-321, 1991. Discusses transonic buffeting, a shock/boundary-layer interaction effect.
15. Sanderson, S.R., H.G. Hornung, and B. Sturtevant, *The influence of non-equilibrium dissociation on the flow produced by shock impingement on a blunt body*, J. Fluid Mech., v. 516, pp. 1-37, 2004. Despite earlier suggestions, high enthalpy does not increase the peak heating.
16. Settles, Gary S., and Lori J. Dodson, *Supersonic and Hypersonic Shock/Boundary-Layer Interaction Database*, AIAA Journal, v. 32, n. 7, pp. 1377-1383, 1994.
17. Stollery, J.L., *Some Viscous Interactions Affecting the Design of Hypersonic Intakes and Nozzles*, pp. 419-437, in *Advances in Hypersonics, Defining the Hypersonic Environment*, edited by Bertin, J.J. et al., Birkhauser, Boston, 1992.
18. *Unsteady Transonic Aerodynamics*, volume 120 in the Progress in Astronautics and Aeronautics series, published by AIAA. Edited by David Nixon. Reviews buffeting and other transonic phenomena that are caused by shock/boundary-layer interactions.
