

U.S. Naval Ordnance Laboratory, Pressurized Ballistic Range, Shot No. 6382, Station No. 17V, Model $\theta_c=5$ deg., Mach number 3.73, Pressure 1005mm, $T_w/T_r = 0.50$. Norm Sheetz photo to Ken Stetson, digitized by S.P. Schneider, 600 dpi, 20 Oct. 2009. Shows single turbulent spot on cone, a little bit upstream of location visible in Station 16V photo. Is station 17V closer to the gun?
