

Fiducial Coordinates for p17_i.raw (from text CD)

(+110.003, -110.012) mm

(-109.990, -110.012) mm

Note orientation of the axes – that will depend on how the film was scanned

The coordinates come from a calibration report

Principal point is at the origin of this coordinate system

(+110.006, +109.984) mm

(-109.994, +109.984) mm

Determine coordinates of control point T19 (shown at right) in the fiducial coordinate system. Use coordinate transformation method.
