EE641-Digital Image Processing II
Fall 2000

Instructor: Charles A. Bouman
Office: MSEE 348
Phone: 49-40340
E-mail: bouman
Office Hours: TTh 11:45 to 12:30 or by appointment
Course Web Page: http://www.ece.purdue.edu/∼bouman/ee641/
Lab Web Page: http://www.purdue.edu/VISE/

This course will cover topics in image processing at the level of current research. Reference material will be primarily in the form of journal publications. The course will include computer homework assignments, computer projects, one take home midterm and a final. Final grades will use the following weighting.

Homework and computer projects	30%
Midterm #1	30%
Final exam	40%

Course Outline

1. Introduction
   a. Random variables
   b. Estimation
   b. Whitening
2. Autoregressive Processes
   a. 1D, 2D
   b. Matrix Representations
   c. Computing optimal predictors
   d. Order estimation
3. Gaussian Random Fields
   a. Gauss-Markov Random Field
   b. Simultaneous AR
4. Image Restoration
   a. GMRF
   b. Optimization
      i. ICD
      ii. Gradient Search
      iii. Convexity
   c. MAP vs. MMSE
5. EM algorithm
   a. Derivation
   b. Clustering
   c. Convergence
   d. Order estimation
6. Markov Chains
   a. Matrix Representation
   b. Parameter estimation
7. Hidden Markov Models (HMM)
   a. Dynamic programming
   b. EM algorithm for training
8. MRF's
   a. Gibb's Distributions
   b. Hammersley Clifford Theorem
   c. Simmulation
9. Segmentation
   a. Bayesian Model
   b. Simulated Annealing
   c. MPM
   d. Multiscale Techniques
10. Emission/Transmission Tomography
    a. Derivation of model
    b. EM algorithm
    c. MRF prior
    d. Influence functions
11. Magnetic Resonance Imaging (MRI)
    a. Derivation of system model
    b. Functional MRI (fMRI)
    c. Open problems
11. Nonlinear prediction
    a. Classification/regression trees
    b. Training and order estimation
12. Multiscale Stochastic Models
    a. Stochastic Trees
    b. Estimation-ML,MPM,SMAP
    c. Fast algorithms
13. Image Search and Query
    a. Similarity measures for images
    b. Tree search and pruning
