

## **Signal and Image Processing Research Engineer/Scientist**

Delphi Research Laboratories is seeking a signal and image processing research engineer/scientist with a PhD in Electrical Engineering, Computer Engineering, Computer Science or equivalent to work with our Devices and Systems teams in developing and implementing new concepts in vision-based safety systems. Possible applications include roadway lane tracking, collision avoidance, and drowsy driver detection. The individual should have a strong and versatile background in signal and image processing, with capability to initiate and conduct research in vision algorithms and sensor fusion. Delphi Research Laboratories is Delphi Automotive Systems' central research facility. Delphi Automotive Systems is a Fortune 500 company with over \$ 25 B in annual revenue. Please send your resume/vita to:
