

Postdoctoral Position Open for Heterogeneous Catalysis at Johns Hopkins University

One or two postdoctoral fellow positions are immediately open at the Department of Chemical and Biomolecular Engineering, Johns Hopkins University. Prof. Chao Wang's group is looking for recently graduated (or in the near future) PhD students with strong experimental skills in heterogeneous catalysis, including catalyst synthesis, reaction kinetic studies and/or surface-specific characterizations (TPD/TPR, DRIFTS, etc.). Working experience in polymer chemistry, zeolites or fluidized bed reactor will be a great plus.

Highly motivated and experienced students are sought with capabilities of carrying out independent research. For those who are interested in this position please feel free to consult with the research scientist in Prof. Wang's group, Dr. Pengfei Xie (pxiel@jhu.edu) for more details. Prof. Wang can also be reached via chaowang@jhu.edu.
