

Rice campus (Houston, TX)

Postdoctoral positions in catalysis in M.S. Wong group at Rice University

- Interested in doing materials chemistry and heterogeneous catalysis of metallic nanostructures?
- Two immediate openings in 2021: one focused on vinyl acetate chemistry (industry collaboration) and one on nitrogen-containing energetic materials synthesis (Army Research Laboratory collaboration)
- Ideal candidates will have excellent oral and written communication skills, broad wet chemistry experience, materials characterization skills, manuscript/report preparation experience, management skills; contribute to positive lab safety culture; interdisciplinary collaborativeness
- 12-month appointment, renewable
- Contact Michael Wong (mswong@rice.edu) with CV
